

Hydroxyzine Tablet Dosage

Hydroxyzine is an antihistamine used to treat anxiety, itching, and allergic reactions. The dosage varies depending on the condition being treated and the patient's age and weight.

Adult Dosage: The usual adult dosage is 25 to 100 mg four times a day, as directed by your doctor. Do not take more than 400 mg in 24 hours.

Child Dosage: The usual child dosage is 1 mg per pound of body weight four times a day, as directed by your doctor. Do not take more than 400 mg in 24 hours.

Elderly Dosage: Elderly patients may require a lower dosage due to decreased kidney function. Your doctor will determine the appropriate dosage for you.

Precautions: Do not take Hydroxyzine if you are allergic to it or if you are taking other medications that may interact with it. Inform your doctor of all medications you are taking.

Side Effects: Common side effects include drowsiness, dry mouth, and constipation. Inform your doctor if you experience any severe side effects.

Warnings: Hydroxyzine may cause drowsiness and impair your ability to drive or operate machinery. Avoid alcohol and other sedatives while taking this medication.

Contraindications: Hydroxyzine is contraindicated in patients with a known hypersensitivity to the drug or its components.

Interactions: Hydroxyzine may interact with other medications, including sedatives, tranquilizers, and alcohol. Inform your doctor of all medications you are taking.

Overdose: In case of an overdose, seek medical attention immediately. Symptoms of overdose may include extreme drowsiness, confusion, and difficulty breathing.

Storage: Store Hydroxyzine tablets in a cool, dry place, away from light and moisture. Keep them out of the reach of children.

Expiration: Do not use Hydroxyzine tablets after the expiration date printed on the packaging.

Manufacturer: Hydroxyzine tablets are manufactured by various pharmaceutical companies. Check the packaging for the manufacturer's name.
