Lexapco

Lexapro® (escitalopram) is used to treat depression and anxiety disorders. In a clinical trial, 100 subjects completed the study. Those treated with Lexapro® showed a mean improvement in depression score of 12.5 points, while those in the placebo group showed a mean improvement of 8.5 points. The standard deviation for the Lexapro® group was 4.0, and for the placebo group, it was 3.0. Assume the data are normally distributed.
