Meloxicam 15mg Cipla is a non-steroidal anti-inflammatory drug (NSAID) used to treat pain and inflammation. It is available in tablet form. The active ingredient is meloxicam, which is a selective COX-2 inhibitor. It is used to treat a variety of conditions, including osteoarthritis, rheumatoid arthritis, and ankylosing spondylitis. The dosage is typically 7.5 mg to 15 mg per day, depending on the condition being treated. It is important to follow the instructions of your healthcare provider when taking this medication. Common side effects include stomach pain, heartburn, and constipation. More serious side effects, such as ulcers and kidney problems, are possible. It is important to avoid alcohol and other NSAIDs while taking this medication. If you experience any of the following symptoms, stop taking the medication and contact your healthcare provider immediately: severe stomach pain, black or bloody stools, or a change in the color of your urine. Meloxicam 15mg Cipla is a prescription drug and should only be used under the supervision of a healthcare provider.
